“GPS Research in Natural Resources”

Friday, September 3, 2010 Athens, GA 10 a.m.-2:30 p.m.

The University of Georgia Warnell School of Forestry and Natural Resources will be hosting a forestry continuing education course on “GPS Research in Natural Resources.” The course will cover basic features of satellite-based navigation systems, methods and errors in assessing data quality in forested conditions, GPS case studies, and pertinent international research. The course is worth four forestry continuing education credits.

The UGA Warnell School of Forestry and Natural Resources offers continuing education courses throughout the year.
